

QUALIFICATION CATEGORIES FOR A SHEPHERD

In order for a man to be appointed as a shepherd-elder consideration should be given to his qualifications in the following categories. Evaluation that is valid is based on acceptable criteria (e.g. Bible and personal observations, etc). Shepherding is based more on the CORE principles of character, trust, integrity and holiness, than personality and power. Place the name of the candidate in the space and then grade him on a scale using **A, B, C, D, F** in each category. This form is merely part of an assessment process.
